Summary

Third year Computer Science student with a growing passion for front end web development. Great and adaptable team player looking for the next internship to further my experience and apply my technical knowledge.

Education / Professional Development

Computer Science, Bachelors of Science, Honours
York University

Currently Enrolled - 2024

Relevant Courses

- User Interfaces
- Fundamentals of Data Structures
- Software Design

2022 Web Development Bootcamp
Udemy.com

Currently Enrolled

- Course designed to learn about Web Development and the MERN stack through project driven learning.

Project Experience

Keeper | React, HTML, CSS

- A note taking web app designed to help users quickly stay on top of daily tasks and thoughts.
- Notes can be easily added and deleted through react hooks.

Colour Game React App | React, HTML, CSS, Javascript, Firebase

- A colour changing game which allows players to select the odd coloured cell. As each level progresses, the ability to differentiate between the cell colours become more challenging.
- Leaderboard and high scores are stored using Firebase

MySpotifyStats | React, HTML, CSS, Bootstrap

- Used Spotify's API to fetch my account's top tracks, top artists, and what I'm playing at the moment.
- Bootstrap, CSS, and HTML were used to display the data fetched.

Skills

React, HTML, CSS, Javascript, Java, Bootstrap, Android Studio, Node.js, Express.js, GitHub

Work Experience

Crew Member

June 2021-July 2021

Coco Fresh Tea & Juice Canada

- Worked in a fast-paced environment while providing great customer service by taking orders, preparing customer drinks to their satisfaction, and collaborating with team members to maintain store cleanliness.
- Maintained company customer service excellence by developing positive relationships with regular customers.
